

## Why do the author names appear screwed up?

Dienstag, den 16. Februar 2010 um 19:02 Uhr -

---

This might happen if you have fed `WibTeX` with entries that do not match `BibTeX` standards. Please use a format like:

*FirstName1 LastName1 **and** Firstname2 Lastname2 **and** Firstname3 Lastname3...*

The key word "and" is crucial for `WibTeX` to format the author names properly. More than one first names are recognized, as well as additions like "van", "de" etc. Refer to the help pages for more details.
