

I want to update WibTeX. How do I keep my data?

Jueves 21 de Enero de 2010 01:50 - Last revised Jueves 04 de Febrero de 2010

Make a copy of your database file and store it in a different folder. To be on the safe side, export your data to a BibTeX file. If you update from a recent version, I should be enough to just de-install the previous version and install the new version.
